

GLO-MASTIC

The seal proven on Australia's biggest grain storages – now built for every farm.

BORN IN THE GRAIN SHED. MADE FOR THE WHOLE FARM.

Glo-Mastic has sealed CBH grain storages since the mid-1980s, then GrainCorp and Viterra since the early 1990s. That same industrial membrane is now available to every farmer, shed owner, and property manager who needs a seal that lasts.

USE IT ON

- ▲ Grain silos and storage sheds
- ▲ Caravans and transportable buildings
- ▲ Shearing and machinery sheds
- ▲ Metal, fibro, masonry and concrete
- ▲ Workshops and implement sheds
- ▲ Flat and low-pitch roofing
- ▲ Home and patio roofs
- ▲ Water tanks and decking

WHY IT WORKS

- ✓ **Stays flexible.**
Tested to 350%+ elongation – moves with your structure, won't crack.
- ✓ **UV and weather resistant.**
Weatherometer tested to the equivalent of 7 years. No loss of flexibility.
- ✓ **Safe around grain and food.**
100% solvent free and water based. No fumes, non-hazardous.
- ✓ **Easy to apply and repair.**
Brush, roller, or spray. Touch dry in 1 to 3 hours. Minimum 10 year lifespan.

Difficult surface? Use Supa Stick first.

On contaminated, bitumen stained or release agent affected surfaces, apply Global Supa Stick Sealer as a primer first. It gives Glo-Mastic a solid foundation to bond to.
